Examiner's Amendments to the Specification

Please amend the first full paragraph on page 1, beginning with "the present application claims benefit ...", as follows:

The present application is divisional application of U.S. Application Number 10/116,326, filed on April 4, 2004, now U.S. Patent Number 6,777,545, issued 17th August 2004, which claims the benefit of U.S. Provisional Application Number 60/282,036, which was filed on April 6, 2001, both of which are herein incorporated by reference in their entirety.

The following is an **Examiner's Statement of Reasons for Allowance**:

Claim 6 is drawn to an isolated human kinase of specific amino acid sequence.

Claimed amino acid sequence is free of prior art. Further, the prior art does not teach or suggest preparing such specifically claimed amino acid sequence. Hence, said sequence is also non-obvious.
